SOCIAL AND ORGANIZATIONAL SKILLS

Ability to work in teams in a variety of situations that require collaboration between different figures; ability to work with people from different cultures; ability to organize own work and that of others.

PROFESSIONAL SKILLS AND COMPETENCES

Ophthalmic examination (children, adults)
Ophthalmic Tests (OCT, retinal angiography, perimetry, corneal topography, keratometry, tonometry, Autorefractometry, echography A-scan and B-scan, in vivo confocal microscopy)
Assistance in the operating room.
During my MD at University "La Sapienza" in Rome, I have been involved in research projects on the evaluation of ocular surface side effects of antiglaucoma drops using in vivo confocal microscopy. During my clinical training in Ophthalmology at San Paolo Hospital in Milan, I have been focused on various research projects on glaucoma and medical/surgical retina. I also have been involved as site investigator in multicentric clinical trials. My main clinical interest is glaucoma and I am regularly involved in patients' care in our glaucoma clinic. I'm actually involved in research projects focused on neuroprotection in glaucoma patients, on perimetric tests and artificial intelligence.
I'm able to perform cataract surgery, trabeculectomies and glaucoma drainage implants.
I serve as reviewer for international peer-reviewed journals such as BMC Ophthalmology and Journal of Ophthalmology.
